FLOWER SEED

Novelties & Specialities for 1897

OFFERED BY

WILLIAM BULL, F.L.S.

In ordering FLOWER SEEDS it will be sufficient to QUOTE THE MARGINAL NUMBERS.

1. PRIMULA SINENSIS FIMBRIATA, SNOWDON.

PRIMULA, SNOWDON.

This magnificent new Chinese Primrose is, without doubt, the finest white variety ever offered. Borne in immense trusses, the flowers, of wonderful substance and glistening snowy whiteness, are of great size, measuring 2½ inches in diameter, beautifully fringed and crenulated, the crimped petals lapping and overlaying one another in such a manner as to impart to the blooms a depth that is quite remarkable.

In growth the plant is of sturdy robust habit, the snowy whiteness of the flowers being admirably set off by the rich green colour of the foliage.

In sealed packets.

3*s*. 6*d*. per packet.

2. **PRIMULA SINENSIS FIMBRIATA, MARS.**—One of the grandest high coloured Primulas ever sent out; immense fiery copper-crimson flowers, deeply fringed and of extra merit. 2*s*. 6*d*. per packet.

3. **PRIMULA SINENSIS FIMBRIATA, SUNSHINE.**—A brilliantly coloured new variety, magenta-crimson, shaded with carmine; flowers finely fringed. 2*s*. 6*d*. per packet.

4. **PRIMULA SINENSIS FIMBRIATA FILICIFOLIA, GARNET.**—A splendid new fern-leaved variety, with rich madder-crimson flowers. 2*s*. 6*d*. per packet.

5. **PRIMULA SINENSIS FIMBRIATA FILICIFOLIA FLORE PLENO, DEFIANCE.** This new fern-leaved variety produces rich crimson-carmine flowers, beautifully double. 2*s*. 6*d*. per packet.

For other choice kinds, *vide* pages 8 and 9.

CROZY'S CANNAS.

6. # CANNAS.

CROZY'S GLADIOLUS-FLOWERED STRAIN.

The magnificent varieties of Cannas raised and sent out by M. Crozy, are too well known and appreciated to need any lengthened description. They are of the greatest value for bedding purposes, and flowering when quite dwarf, are admirably adapted for growing in pots for the decoration of greenhouses and conservatories, their showy spikes of flower remaining in full beauty for a length of time, exhibiting a wealth and variety of gorgeous colouring scarcely obtainable in any other class of plant. Some are brilliant yellow, others intense shades of scarlet, orange, salmon, crimson, red, maroon, &c., many being dotted, striped, maculated or rayed with yellow or scarlet, others again being crimson or scarlet, margined with a band of golden yellow; the flowers indeed are most diversified and pleasing in every way.

Mixed Seed, saved from Crozy's new varieties. 1*s.* 6*d.* and 2*s.* 6*d.* per packet.

For dormant roots, *vide* page 69.

DIANTHUS SUPERBUS, "TELEKII."

7. # DIANTHUS SUPERBUS, "TELEKII."

This desirable novelty is a cross between *Dianthus superbus* and *Dianthus chinensis*, possessing all the advantages of both parents without their defects. It can be grown either as an annual or biennial, blooming continuously from June until October, and being of a more robust and sturdy habit than its congeners, is less affected by inclement weather. The flowers are mainly double, with here and there a semi-double or single variety, the colours ranging from pure white to blackish carmine and violet.

1*s.* per packet.

LOBELIA, BARNARD'S PERPETUAL.

PRIMULA FLORIBUNDA.

8. AMARYLLIS.

New Hybrids, very choice. Saved from a collection of exceptionally fine varieties. 2*s.* 6*d.* per packet.

9. DATURA CORNUCOPIA.

A very interesting and beautiful plant that will succeed either in a greenhouse or planted out in a sunny position. The flowers are deliciously fragrant, the individual blooms being of immense size; the inner surface is French white, while the outside is marmorated and suffused with bright purple. 9*d.* per packet.

10. LOBELIA, BARNARD'S PERPETUAL.

This splendid acquisition sent out by Mr. William Bull, is without doubt the finest Lobelia yet raised. The flowers are of the most brilliant ultramarine blue, strikingly ornamented with a pure white marking at the base of each of the two lower petals. It is of compact habit, and also useful for bedding or growing in pots, while the bright and effective colouring of its flowers, combined with its perpetual blooming character, renders it most desirable for beds and ribbon borders. It was awarded a Certificate of Merit by the Royal Horticultural Society when exhibited in May, 1892, at the Temple Show. 6*d.* per packet.

11. PRIMULA FLORIBUNDA.

A lovely greenhouse species, producing from early Spring till late in Autumn a continuous display of brilliant clear yellow flowers. The blossoms are borne in superposed whorls on erect stems, in the most profuse manner, as many as five or six stems being produced by one crown. Will succeed in any greenhouse or conservatory. Has been awarded a First-Class Certificate. 1*s.* 6*d.* and 2*s.* 6*d.* per packet.

11A.

CARNATION, PERPETUAL TREE, "RIVIERA MARKET."

The Seed now offered has been saved from the finest strain of these lovely flowers on the Riviera, where their beautiful blossoms of almost every shade of colour are so highly appreciated. The plants are of very rapid growth, and quickly attain a flowering size, rivalling the well-known Margarot Carnation in this respect. A high percentage of splendid double flowers may be expected, including a good proportion of yellows. 2*s.* 6*d.* per packet.

GLOXINIA, "PRINCESS MAUD."

12.

GLOXINIA, "PRINCESS MAUD."

A most handsome new variety, throat shining crimson shading to the mouth a rich dark carmine; petals rich violet, a broad band of white spotted with violet surrounding the whole flower. *Vide* illustration. 1*s.* 6*d.* per packet.

13.

PHYSALIS FRANCHETI.

A handsome variety of the Winter Cherry, freely producing large and most attractive seed capsules, the semi-transparent envelope surrounding the fruit being of an intense orange red colour, the network of veins lending an additional charm to its appearance. Most useful for the decoration of either garden or greenhouse. The Cherry-like fruit is edible, and makes an agreeable preserve. 1*s.* per packet.

PETUNIA, "SNOWBALL."

14.

PETUNIA HYBRIDA, "SNOWBALL."

A new and very dwarf variety that comes quite true from seed, and will be found especially useful for pots and bedding out; its beautiful large satiny white flowers being continuously produced in the most profuse manner throughout the Summer. 1*s.* per packet.

15.

TORENIA FOURNIERII, "PRINCESS HELENE."

The flowers of this handsome novelty are of immense size, being twice as large as the well-known *T. Fournierii grandiflora*. The colour is porcelain blue, with deep indigo purple spots. 2*s.* 6*d.* per packet.

POLYANTHUS, HARDY HYBRIDS.

16. SAINTPAULIA IONANTHA.

A distinct and pretty greenhouse plant, producing an abundance of Violet-like flowers on slender stalks. The blossoms are of a violet blue colour, with golden yellow stamens. A most charming and desirable plant, which cannot fail to become a general favourite.

1*s.* 6*d.* per packet.

17. POLYANTHUS, HARDY HYBRIDS.

EXTRA SELECTED.

These beautiful hardy hybrid Polyanthus cannot be too highly recommended, for they produce throughout the Spring, a wealth of bloom which can hardly be surpassed for beauty and richness of colouring. Amongst them will be found lovely shades of crimson-maroon, rich purple and deep orange passing through many charming variations of colour to the palest primrose and purest white. Being of the easiest cultivation and perfectly hardy, the beauty and agreeable fragrance of the flowers should ensure them a place in every garden.

1*s.* per packet.

ROSA MULTIFLORA, "DWARF PERPETUAL."

18. ROSA MULTIFLORA,

"DWARF PERPETUAL."

A new race of Dwarf Fairy or Miniature Roses, flowering in the most profuse manner the same year as sown. The blossoms are of all the colours existing amongst ordinary Roses, some being single, others semi-double, and many completely double of rosette formation. The cultivation and raising of these new dwarf Roses will be found most interesting, some of the plants flowering six or eight weeks after sowing, and being of a perpetually flowering character, continue in bloom throughout the season, the little plants becoming covered with a multitude of the most charming flowers.

1*s.* per packet.

PRIMULA OBCONICA GRANDIFLORA.

19.

PRIMULA OBCONICA GRANDIFLORA.

A large-flowered form of the pretty decorative *Primula obconica*, producing almost continuously large trusses of bloom, the individual flowers measuring from 1 to 1¼ inch in diameter; they are also much deeper in colour than the normal small-flowered type, to which it is infinitely superior. This must not be confounded with varieties offered on the Continent and elsewhere, to which it is not to be compared.

1*s.* 6*d.* and 2*s.* 6*d.* per packet.

WALLFLOWER, RUBY GEM.

20.

STREPTOCARPUS.

New Hybrids.

These handsome hybrids are admirably adapted for greenhouse and conservatory decoration, their pretty trumpet-shaped flowers being produced in the utmost profusion through the Summer and early Autumn months. The value of these charming flowering plants is greatly enhanced by their great diversity of colour, which ranges from pure white to deep rose and violet-purple.

1*s.* 6*d.* and 2*s.* 6*d.* per packet.

21.

WALLFLOWER,

RUBY GEM.

This fine novelty is the most brilliant and effective variety of Single Wallflower hitherto sent out. The colour is a clear shade of ruby violet with a bluish satin-like sheen, and when seen in a mass the effect is most striking. In habit it is bushy, of medium height, the flowers extra large and of good substance.

8*d.* per packet.

SEEDS FROM PRIZE STRAINS.

CALCEOLARIA.

22. **CALCEOLARIA, HERBACEOUS, Prize Strain.**—With the greatest confidence Mr. W. B. recommends the above magnificent strain; the seed has been saved from a collection of the most beautiful and varied flowers, of excellent form and substance, and including almost every shade of colour, exquisitely spotted and blotched, the foliage retaining a healthy green colour throughout the season.

1*s.* 6*d.* and 2*s.* 6*d.* per packet.

CINERARIA.

23. **CINERARIA, choice mixed.**—Saved from a collection unsurpassed for richness and variety of colour, perfection of form, and elegance of habit.

1*s.* 6*d.* and 2*s.* 6*d.* per packet.

24. **CINERARIA, DOUBLE, choice mixed.**—This may be expected to produce a good percentage of double flowers of many beautiful colours.

2*s.* 6*d.* per packet.

25. **CINERARIA HYBRIDA GRANDIFLORA NANA.**—Splendid dwarf variety with large flowers of many beautiful colours and shades.

1*s.* 6*d.* and 2*s.* 6*d.* per packet.

26. **CINERARIA HYBRIDA GRANDIFLORA, BLUE.**

2*s.* 6*d.* per packet.

27. **CINERARIA HYBRIDA GRANDIFLORA, WHITE.** 2*s.* 6*d.* per packet.

28. **CINERARIA HYBRIDA GRANDIFLORA, CRIMSON.** 2*s.* 6*d.* per packet.

PRIMULAS.

Special Offer of Seed from Prize Strains.

29. **PRIMULA SINENSIS FIMBRIATA ALBA.** 1*s.* 6*d.* and 2*s.* 6*d.* per packet.

30. **PRIMULA SINENSIS FIMBRIATA RUBRA.** 1*s.* 6*d.* and 2*s.* 6*d.* per packet.

31. **PRIMULA SINENSIS FIMBRIATA, RED AND WHITE, MIXED.** 1*s.* 6*d.* and 2*s.* 6*d.* per packet.

Mr. WILLIAM BULL has the greatest confidence in offering Seed of the above, knowing that the produce cannot be excelled, it having been saved from the finest strains in cultivation, the flowers being remarkable for size, brightness of colour, and substance, while in general habit the plants leave nothing to be desired.

32. ## PRIMULA SINENSIS FIMBRIATA.

"PREMIER MIXTURE."

Seed of Mr. WILLIAM BULL's select strain is offered in mixture, containing all the new and most distinct colours and varieties; the many unsolicited testimonials received point conclusively to the fact of its being appreciated as of unusual excellence. To distinguish this from the ordinary mixture of *P. alba* and *rubra* generally supplied, Mr. W. B. designates this choice mixture as above. 1*s.* 6*d.* and 2*s.* 6*d.* per packet.

FERN-LEAVED PRIMULAS.

PRIMULA SINENSIS FIMBRIATA FILICIFOLIA, GARNET, *vide* page 1.

33. **PRIMULA SINENSIS FIMBRIATA FILICIFOLIA, PURITY (New).**—Flowers pure white, of great substance and beautifully fringed; of compact dwarf habit. 2*s.* 6*d.* per packet.

34. **PRIMULA SINENSIS FIMBRIATA FILICIFOLIA ALBA.** 1*s.* 6*d.* and 2*s.* 6*d.* per packet.

35. **PRIMULA SINENSIS FIMBRIATA FILICIFOLIA RUBRA.** 1*s.* 6*d.* and 2*s.* 6*d.* per packet.

36. **PRIMULA SINENSIS FIMBRIATA FILICIFOLIA, MIXED.** 1*s.* 6*d.* and 2*s.* 6*d.* per packet.

The above beautiful varieties of the Fern-leaved section possess most elegantly fringed edges.

Sow Aster seed in April and May, in pans, or on a spent hot-bed in drills 6 inches asunder; when the plants are 1 inch high, prick out into a cold frame, or under hand-glasses, 3 or 4 inches apart, from whence they can be planted out when 4 inches high. Select showery weather for planting out, when the ground is in good working order; plant in rows 1 foot apart each way. To grow Asters to perfection, a rich soil is indispensable, and during dry weather they should be watered, and a top-dressing of well-rotted manure applied early in August.

STOCKS.

EAST LOTHIAN STOCK.

If grown in a rich soil they will keep up a succession of bloom from July until the end of November, after which the plants may be potted and kept to make a further display during the following summer.

TIME OF SOWING.

HARDY ANNUALS may be sown in March and April (and for early spring blooming in August and September), in a sheltered situation, and when up, thinned so as to keep them strong. In March they may be transplanted where they are to bloom. Before sowing, which should be done on a fine dry day, carefully prepare the soil, and in covering, regulate the thickness by the size of the seeds—small seeds should be very lightly covered. Success in growing annuals depends in a great measure upon their being properly thinned to regular distances, so as to give plenty of room for the full development of each plant; this, in too many instances, is entirely neglected, hence the dissatisfaction so often expressed as to their use.

HALF-HARDY ANNUALS may be sown in March and April, in pans, placed on a slight hot-bed, and, when strong enough, pricked out into a cool frame near the glass, where they may get hardened and well established for transplanting into their blooming quarters early in May, or potted off singly for conservatory and greenhouse decorations. Under favourable circumstances many varieties will bloom freely if sown in the open ground about the middle of May.

TENDER ANNUALS such as Balsams, Celosias, Thunbergias, &c., require raising in a temperature ranging from 60° to 70°. Sow in pans or pots, and place near the glass; keep the soil moist, and shade from the sun until the plants appear. When strong enough, pot off into small pots, keeping them near the glass, and admitting air on every favourable occasion.

BIENNIALS AND PERENNIALS.—The more select and tender varieties for summer and autumn blooming may be sown in a gentle heat in March and April, and pricked out into pots until fully established, and then potted off singly, or transplanted into the open ground, as required. The hardier varieties may be sown in the open ground, in prepared beds, in June and July, and when strong enough transplanted into nursery beds, or where they are intended to bloom the following year.

In ordering Flower Seeds it will be sufficient to quote the marginal numbers.

CHOICE COLLECTIONS OF FLOWER SEEDS.

As in Flower Seeds new species or varieties and improved strains are being constantly imported, proved, or raised, and offered by Mr. William Bull, it naturally follows that giving mere names and descriptions convey in many instances but an inadequate idea of the desirability of some of the handsomest and best introductions. Collections of Flower Seeds are therefore made comprising the choicest strains of popular favourite flowers, and including selections of the best novelties.

Quality rather than quantity being especially considered—Mr. W. B.'s selections may safely be relied on in these Collections.

CHOICE COLLECTIONS OF VEGETABLE SEEDS

FOR ONE YEAR'S SUPPLY.

The following Collections of Vegetable Seeds have been arranged to meet the requirements of those who have not time or inclination to make their own selections. They are made up in the most liberal manner, care having been taken to give all the best and most useful varieties in each section, rather than a long list of comparatively useless kinds—

SELECT GENERAL LIST OF VEGETABLE SEEDS.

In the following General List of Vegetable Seeds, Mr. WILLIAM BULL has excluded all varieties of doubtful origin and quality, only the most distinct and useful varieties in each section being quoted. The Stocks of all seeds have been carefully selected from the most eminent cultivators at home and on the Continent, and their growth having been effectually tested, they are confidently offered as being the very best that can be procured.

ARTICHOKES.

Sow early in March, in rich soil, and when strong enough plant in rows 4 feet apart, and 30 inches from plant to plant.

BEANS.

For successional and main crops, sow in February, March and April. The later kinds should be planted in drills 3 inches deep, 4 to 6 inches apart in the rows, the rows to be 2 feet apart. A deep, strong, tenacious soil is most suitable, trenched 2 feet deep, and liberally manured.

BULL'S
FOOD FOR PLANTS.

Contains in a concentrated form all the essential elements of plant life. It is of immense benefit applied as a top-dressing to plants and bulbs of all sorts grown in pots, especially when pot-bound, completely restoring exhausted energy, a few applications ensuring vigorous healthy growth, the flowers being produced in a most luxurious manner, combined with great richness of colouring. It can also be mixed with ordinary soil in potting, or may be used with most beneficial effect for Chrysanthemums, Shrubs, Vines, and all kinds of Fruits, whether in pots or planted in the open air.

FOR TESTIMONIALS see next page.

ANALYSTS' REPORT.

The analysis shows this to be a complete Plant Food, and of the highest quality. The material not only contains an abundance of all the constituents necessary for plant growth, but the analysis shows also that the four chief constituents are each in that combination which renders them in the most beneficial and available form for the healthy development of plants.

For these reasons, users of this Plant Food in the proper quantities cannot fail to produce the very best results within the capability of their plants.

CANNON & NEWTON,
Analytical and Consulting Chemists, 39, Mincing Lane, London, E.C.

DIRECTIONS FOR USE.

For POT PLANTS AND BULBS.—Sprinkle on the surface of the soil, about every three weeks, at the rate of a small teaspoonful to a 5-inch pot, so that when the plants are watered, the Plant Food will be gradually absorbed into the soil.

For CHRYSANTHEMUMS.—At the time of potting, some of the Plant Food should be thoroughly mixed with the compost, and afterwards, when the buds begin to swell, frequent top-dressings should be given, the quantity used being estimated according to the size of the pots and vigour of the plants.

For ROSES, SHRUBS, VINES, &c., in Pots.—Use about a tablespoonful to a 12-inch pot several times during the season.

For ROSES, PLANTS, FRUITS, VEGETABLES, and all Plants in Borders and the Open Ground.—Apply about 2 ozs. to the square yard as often as occasion may require, raking and watering it in.

For LAWNS.—Scatter broadcast at the rate of 2 ozs. to the square yard, and well water.

Sold in Tins, containing about 1½ lbs., price 1s. each. Larger Size, containing about 5 lbs., 2s. 6d. each.

Also in Bags, 14 lbs., 4s. 6d.; 28 lbs., 7s. 6d.; 56 lbs., 12s. 6d.; 112 lbs., 20s.

BULL'S FOOD FOR PLANTS.

TESTIMONIALS.

BISHOP'S BURTON HALL, BEVERLEY, *6th August*, 1895.

Dear Sir,—I have tried your Plant Food with great success. I consider it the best Plant Food in the Market, its effects are marvellous. Please send me another cwt.

Yours respectfully, JAMES SMART, Gardener to E. R. B. Hall-Watt, Esq.

THE GARDENS, MOUNT MERRION, BOOTERSTOWN, DUBLIN, *4th December*, 1894.

Sir,—I am well pleased with your Plant Food. I grew my Chrysanthemums this year with it, and won four First Prizes, one £20 Cup, and one £10 Cup at the Dublin Show.

Yours truly, HUGH CRAWFORD, Gardener to the Rt. Hon. Earl of PEMBROKE.

CROFTON, AIGBURTH, LIVERPOOL, *20th February*, 1894.

Dear Sir,—After giving your Food for Plants a fair trial for over two years, I must say that I like it better than any Artificial Manure I have ever used. In 1892 I grew my Chrysanthemums with it, which won the 10-Guinea Cup at Grassendale and Aighurth Shows, also the First Prize at Liverpool. In 1893 I was again successful in carrying off like honours. I have used it on hard and soft wooded plants, and the results were everything that could be desired. It has no unpleasant odour, so that, unlike many Manures, is not offensive in the Conservatory.

Yours truly, DONALD FORBES.

HARKSTEAD RECTORY, near IPSWICH, *May 10th*, 1894.

Dear Sir,—Having used your Plant Food on Chrysanthemums with such good results, I have no hesitation in saying that it is the best Artificial Manure I have ever used, producing flowers of great size and depth, indeed, it is invaluable to those who have to exhibit blooms of the finest quality. One thing greatly in its favour is, that if applied in moderation, anyone may use it without running the risk of injuring the roots or the flowers damping, which is often the case with other Manures.

I am, Sir, yours respectfully, GEORGE JORDAN, Gardener to the Rev. HUGH BERNERS.

IMPNEY HALL, DROITWICH, *13th February*, 1893.

Dear Sir,—I am very pleased with the results from using your Plant Food. I grew my Chrysanthemums with it last season, which won the City of Edinburgh Silver Cup, also the three First Prizes for cut-blooms in the large Open Classes at Birmingham, and the First Prizes at Sheffield. I have also used it with excellent results for Strawberries, Melons, Pines, &c. I am now using it on Vine and Peach Borders with every confidence of its producing good results. I shall be glad if you will kindly forward another 5 cwt. and oblige,

Yours truly, RICHARD PARKER, Gardener to J. CORBETT, Esq.

CROSWOOD PARK, ADENYSTWITH, *17th March*, 1894.

Dear Sir,—I am delighted with your Food for Plants. I find it is excellent for Chrysanthemums, Pelargoniums, Fuchsias, Cinerarias, &c., in fact for all soft wooded plants. I also used it on my Vine borders and it enabled young Vines to carry remarkably heavy crops that ripened up well, while the flavour was everything that could be desired. A great advantage is that it has no unpleasant smell, so can be used in the Conservatory.

I am, yours faithfully, R. C. WILLIAMS, Gardener to Rt. Hon. Earl of LISBURNE.

OAKLANDS, AIGBURTH, LIVERPOOL, *12th March*, 1894.

Dear Sir,—I have much pleasure in stating that I have used your Food for Plants with great success on Vines, Peaches, Roses, &c., in fact I never had better results. For hard and soft wooded plants I can confidently recommend it as a safe and excellent Fertilizer. Yours truly, JOHN BOUNDS, Gardener to ALFRED L. JONES, Esq.

THE NURSERY, HAMMOND STREET, CHESHUNT, *July 18th*, 1894.

Dear Sir,—Will you send me 1 cwt. more of your Plant Food, and quote price for quarter ton, as I find my Tomatoes have greatly improved since using it on them, according to the directions. Yours truly, B. SEARING.

THE GARDENS, KEIR, DUNBLANE, BRIDGE OF ALLAN, N.B., *8th September*, 1893.

Dear Sir,—Your Plant Food is the best I have ever used. I have tried it on various plants with excellent effect, and for stimulating and imparting colour to Crotons and other foliage plants, it is all that can be desired. I tried it on Cyclamens, and the results were marvellous. I took First Prize with these at Edinburgh last year. Kindly send me double the quantity, obliging

Yours truly, THOMAS LUNT, Gardener to ARCHIBALD STIRLING, Esq.

MANOR HOUSE, STRATTON AUDLEY, BICESTER, *9th November*, 1893.

Dear Sir,—I have used your Food for Plants for nearly two years, and like it better than any artificial Manure I have ever had. I have used it on my Vines and Dover had such a good crop. It is excellent for Chrysanthemums, Primulas, Ferns, &c. Please forward me another cwt., and oblige,

Yours faithfully, W. PARKER, Gardener to the Right Hon. Lady ROSE LEIGH.

ST. ANNE'S, CLONTARF, DUBLIN, *2nd March*, 1893.

Dear Sir,—I have used many Artificial Manures for plants in the past 36 years, but none that I like so well as your "Plant Food." Not only is it a quick Fertilizer, but it has no unpleasant odour—a great desideratum.

Yours faithfully, CHARLES SMITH, Gardener to the Right Hon. Lord ARDILAUN.

THE DEN, BELFAST, *27th January*, 1893.

Dear Sir,—You will doubtless be interested to know that last season I won twenty-three First and ten Second Prizes for plants and fruit grown with your Food for Plants, which has proved a most excellent stimulant, and is certainly the best Manure I have ever used. It is cleanly to use, creates no fungus, and has no unpleasant odour; in fact, no gardener should be without it. Please send me another cwt. and oblige,

Yours truly, WM. McILROY, Gardener to G. W. WOLFF, Esq.

LEIGHTON GARDENS, WELSHPOOL, *7th January*, 1892.

Now that I have used Mr. William Bull's Food for Plants over twelve months, I have very great pleasure in stating that I believe it to be the best Plant Manure in the market. It produces fine foliage, large flowers, and gives a good healthy appearance to Stove and Greenhouse Plants in general. I have also used it on Melons, Cucumbers, Tomatoes and Vines with good results, and it is excellent for Chrysanthemums.

WILLIAM ROTHWELL, Gardener to Mrs. NAYLOR.

FORDE ABBEY, CHARD, *27th January*, 1894.

Dear Sir,—I think most highly of your Plant Food. It is splendid for all kinds of pot-stuff, and especially that which needs a strong Manure. It is grand for Chrysanthemums and all kinds of Winter-blooming plants.

Yours truly, JOHN CROOK, Gardener to W. H. EVANS, Esq.

For Full Particulars see preceding page.

GLADIOLUS.

(HYBRIDS OF GANDAVENSIS.)

There are few flowers more showy and beautiful than the Gladiolus, and the varieties of the *Gandavensis* section are perfectly hardy and easily grown, whilst their erect and stately growth, and long spikes of flowers, developing themselves successively, never fail to win admirers.

To facilitate the cultivation of this highly decorative plant, a few remarks may be necessary to some :—

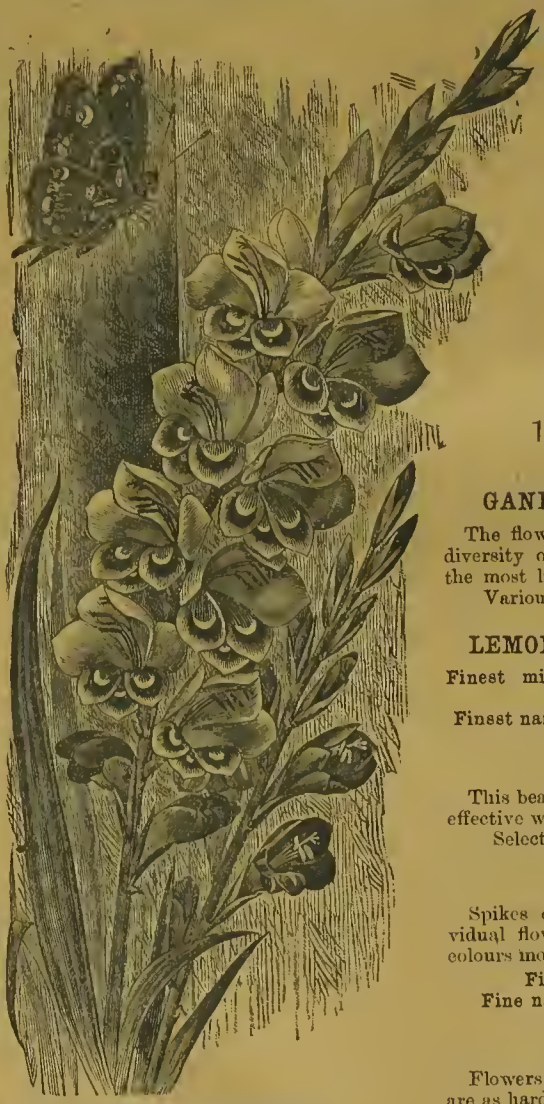
The best and safest time for planting is from the beginning of April to the end of May, when a continuous bloom may be assured from July to September.

Soil is not much a point for consideration, so long as it is not stiff and consolidated ; but it is important that it should be deeply dug previous to planting.

Large bulbs should be planted from 3 to 4 inches, and smaller bulbs 2 inches deep.

During excessively dry weather, copious waterings are recommended.

When any bulbs show signs of growth before the time mentioned above, they should be potted and kept in a cool frame until the proper season for planting out.



LEMOINE'S GLADIOLUS.

This beautiful tribe of plants should be largely planted everywhere.

Orders are booked throughout the year at the following prices, and the bulbs supplied in January, February, or March.

AMARYLLIS BELLADONNA.

AMARYLLIS FORMOSISSIMA.

AMARYLLIS.

This deservedly popular family cannot be too highly recommended. The ease with which they are cultivated and the gorgeously beautiful flowers they produce at almost any season, make them most desirable in any collection. By gradually drying the bulbs they can be put to rest at any time during the year, and then, when required, if started in a gentle heat, they quickly develop their large Lily-like blossoms, which are of various colours, generally embracing crimson, white and red, scarlet, rose-flaked, striped white and crimson, with various shades of colours.

Choice selections of good sorts, 2, 3, 4, 5, and 6 guineas per dozen.

For Seed of Choice Amaryllis, *vide* page 3.

AMARYLLIS BELLADONNA.

(The Belladonna Lily.)

These beautiful hardy bulbs have large handsome blush flowers, richly flushed with rosy purple, rendering them extremely useful for greenhouse and conservatory decoration. 6*s*. and 9*s*. per dozen; 40*s*. to 60*s*. per 100.

AMARYLLIS IGNESCENS.

This distinct and ornamental species is one of the most handsome of stove bulbs. It is very free-blooming, and bears on erect scapes umbels of fiery orange-scarlet flowers. 2*s*. 6*d*. and 3*s*. 6*d*. each; 18*s*. and 30*s*. per dozen.

AMARYLLIS FORMOSISSIMA.

A very handsome bulbous plant, freely producing magnificent flowers of a very rich dark velvety crimson. This distinct and attractive Amaryllis is very suitable for growing in pots, and is always interesting, owing to the rich colour and peculiar shape of its flowers. *Vide* illustration. It will succeed well in a warm greenhouse. 6*d*. each; 5*s*. 6*d*. per dozen.

SINGLE-FLOWERED BEGONIA.

DOUBLE-FLOWERED BEGONIA.

BEGONIAS.

HANDSOME FLOWERED TUBEROUS-ROOTED SECTION.

The immense size to which the flowers of this popular race of plants have now attained considerably enhances their value for decorative and bedding purposes. Of nearly every shade of colour, from deepest crimson-scarlet to white, the blooms are produced in the utmost profusion, thus rendering them extremely showy and attractive.

SINGLE-FLOWERED.

Selections of good single-flowering named varieties can be made by Mr. W. B. at 12s., 18s. and 24s. per dozen.

Single-flowered unnamed Seedlings of various colours, 4s., 6s. and 9s. per dozen; 25s., 35s. and 50s. per 100.

CYCLAMEN AFRICANUM.

CYCLAMEN PERSICUM.

Too much can scarcely be said in favour of the superb varieties of this plant, of which the old *C. persicum* is the type, whether they are regarded as objects for the ornamentation of the greenhouse or conservatory, or for table decoration, for which their compact floriferous character eminently fits them. The flowers are also extremely useful for bouquets, and when plucked, if kept in water, they will last in freshness and beauty some weeks. 9*s.*, 12*s.* and 18*s.* per dozen. Flowering plants, 24*s.*, 30*s.* and 42*s.* per dozen.

CYCLAMEN AFRICANUM, a handsome, hardy species, with large ornamental leaves. Flowers bright reddish crimson. *Vide* illustration. 1*s.* each; 10*s.* per dozen.

Assortment of 12 in 12 choice varieties, 4*s*., 6*s*., 9*s*. and 12*s*.

IRIS KÆMPFERI.

Many magnificent varieties of this handsome and attractive plant have been imported from Japan; indeed scarcely any plants in the flower garden can compare for gorgeous beauty with this section of Iris. Varying in colour from pure white to rich maroon-crimson, there are few flowers surpassing them in size and the brightness of their colouring. They succeed admirably planted on the margin of a lake or pond, or in any situation where plenty of moisture can be given. 2*s*. 6*d*. and 3*s*. 6*d*. each; 24*s*. and 36*s*. per dozen. Choice varieties, 5*s*. and 7*s*. 6*d*. each. Mixed Seedlings, 7*s*. 6*d*. and 10*s*. 6*d*. per dozen.

TUBEROSUM.—Flowers scarlet and yellow; a very attractive and decorative species for open-air cultivation. 3*s.* per dozen; 4*d.* each.

DOUBLE TUBEROSES

(POLIANTHES TUBEROSA.)

The perfectly double flowers of *Polianthes* are well known for their delicious fragrance and pearly whiteness, being admirably adapted for Button-holes, Bouquets, &c.; indeed, are of the greatest value wherever cut flowers are required. By successional plantings these lovely flowers may be had all through the summer and autumn. They should be potted in rich loamy soil and started in a good bottom heat, being afterwards grown on in a stove, with plenty of moisture.

DOUBLE AMERICAN.

"THE PEARL."

Selected bulbs, 2*s.* 6*d.* per dozen; 15*s.* per 100.

Finest picked bulbs, 20*s.* per 100.

The above can be supplied about the end of December.

CHOICE GLOXINIAS.

The handsome and showy flowers of these beautiful bulbous plants render them of the greatest value for the decoration of stoves and conservatories. Of easy culture, they can, with judicious treatment, be had in bloom at almost any season of the year; their attractive flowers, being of large and good shape, are admirably adapted for cutting. The colours are most varied, every hue being pure and distinct, while some of the kinds are spotted and maculated in a most pleasing manner.

Choice selections made by Mr. W. B. at 18s., 24s. and 30s. per dozen, according to sorts.

GLOXINIA.

Good blooming tubers, unnamed, of various colours, raised from handsome varieties, 4s., 6s. and 9s. per dozen; 30s., 40s. and 50s. per 100.

GLOXINIA, MONT BLANC.

A handsome pure white variety. 9d. each; 7s. 6d. per dozen.

GLOXINIA, SPARKLER.

A handsome variety with rich bright crimson flowers. 1s. 6d. each; 15s. per dozen.

TYDÆAS.

These can be cultivated so as to produce an abundance of bloom throughout the winter, their flowering season principally depending on the time of year their tubers are started into growth. With a little management a succession of blooming plants can be had nearly throughout the year. 18*s*., 24*s*. and 30*s*. per dozen, according to sorts.
